

# 06 – CREATE & SUPPORT THE KOSMUNITY

THOMAS DELMAS (CNES)  
**KOSMOS DAY 2025 - 15/09/2025**

# KOSMUNITY : WHAT IS IT?

... All KOSMOS users.

# SUPPORT THE KOSMUNITY : THE CURRENT SITUATION

## A complete, but complex environment

- The environment is **constantly** being **enhanced** with new features.
- **Complexity increases** as a result, to the detriment of accessibility.
- The documentation associated with KOSMOS has considerable room for improvement.

## An expensive entry ticket

- Developing skills independently in the KOSMOS environment today is challenging:
  - **Technical complexity**
  - **Limited training materials**
- This observation will be even more true as the KOSMOS environment becomes more comprehensive.
- This effort is particularly impacting junior profiles (students, interns, PhD students, first-time job seekers, etc.)

## The issue of support for experienced users

- How can I **keep up to date** with developments and new features in KOSMOS?
- How can I **alert users** if an anomaly is detected, and how can I share feedback?
  - Currently, feedback is centralized and distributed by CNES.

# SUPPORT THE KOSMUNITY : CLASSICAL TRAINING COURSE TODAY

## KOSMOS High-Level Presentations

- Introductory presentations
- Theoretical training days at KOSMOS

## Practical work (TP LVROOT)

- Can be supervised by the CNES or performed independently
- This lab allows to play with the KOSMOS configuration and add partitions
- A user who needs to develop an application partition, for example, will need more.

## Access to resources

- Code (Gitlab)
- Documentation (Confluence)

## Skills increase, in autonomy

- With, on a case-by-case basis, support from CNES

Things exist.

They are largely improvable

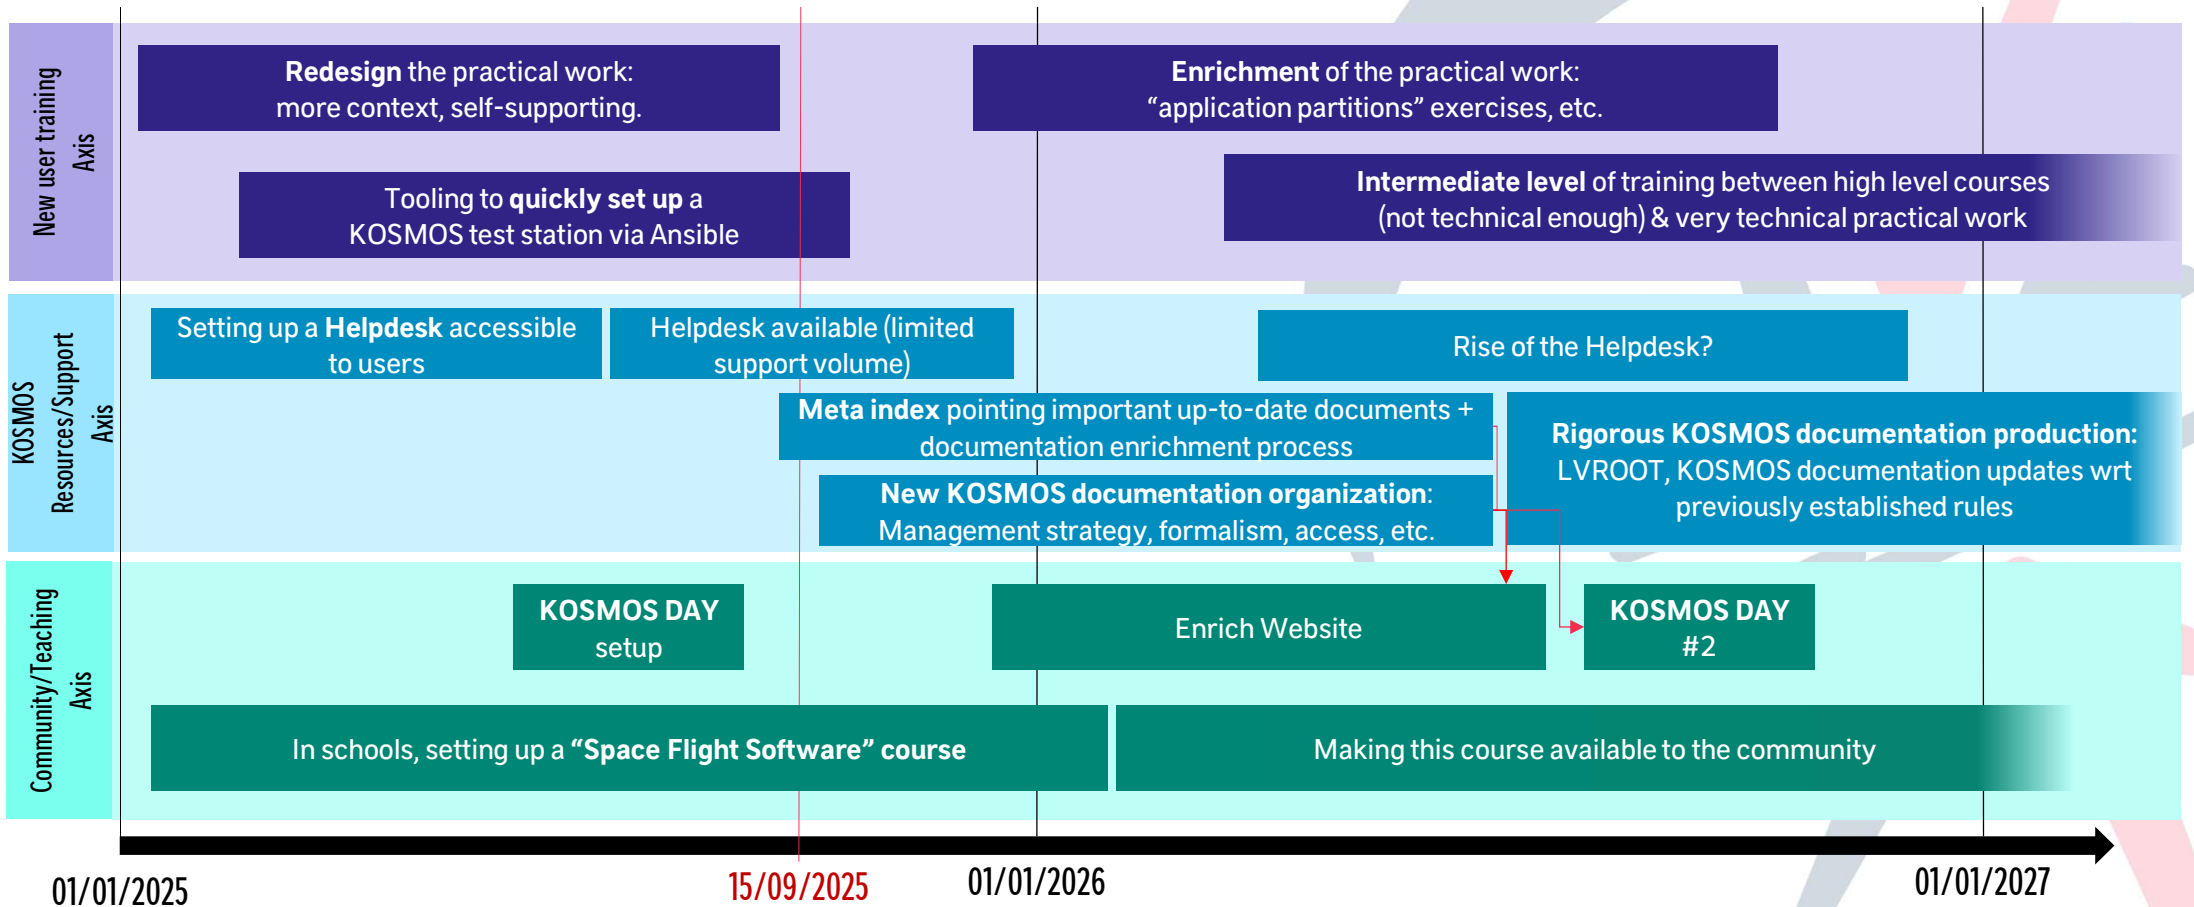

A satellite is shown in space, with the Earth's horizon visible in the lower right. The background is a deep blue space filled with stars. The text is overlaid on this image.

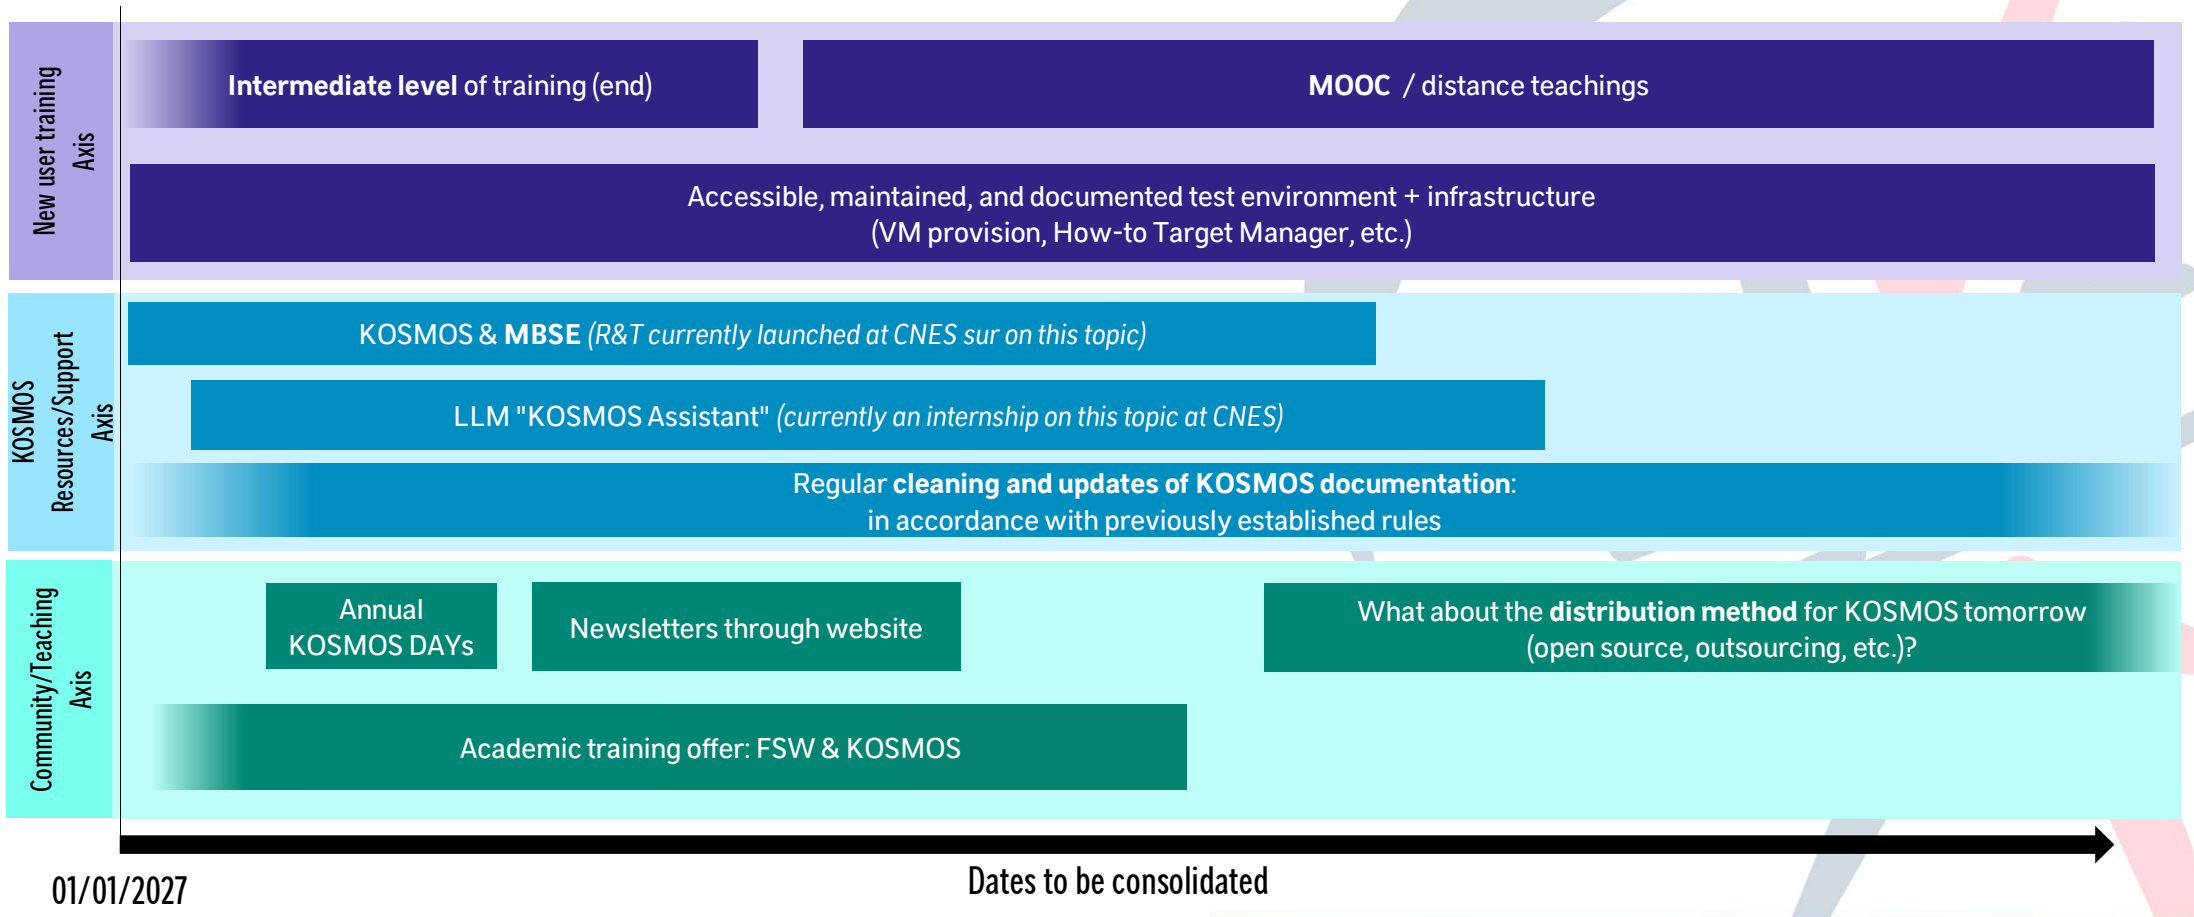

# IN FRONT OF THESE OBSERVATIONS

HERE ARE OUR IDEAS

# SUPPORT THE KOSMUNITY : CURRENT / SHORT-TERM PROJECTS

# SUPPORT THE KOSMUNITY : MEDIUM TERM PROJECTS

A satellite is shown in space, with the Earth's horizon visible in the lower right. The background is a deep blue space filled with stars. The satellite is a complex structure with various instruments and antennas.

# **WE NEED YOU !**

LET'S DISCUSS THIS TOPIC TOGETHER THIS  
AFTERNOON DURING A ROUND TABLE.
